

A good reason to pull a record off the shelf.

A native app for cataloging and rediscovering your vinyl and CD collection.

iPhone · iPad · Apple Watch · Mac

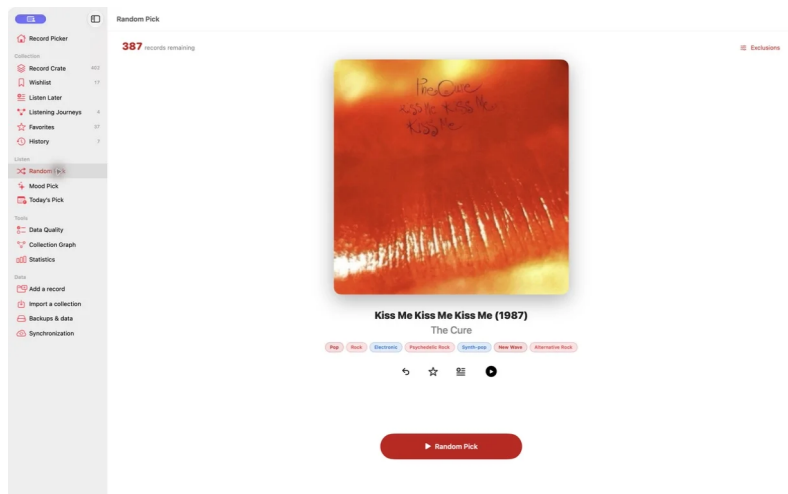

Record Picker 2.6 - Mac - EN

2.6 “Snow Leopard” is available on Apple platforms. This release improves backups, cover artwork restoration and reliability.

Windows: 2.5 available, 2.6 coming soon. Android: in development.

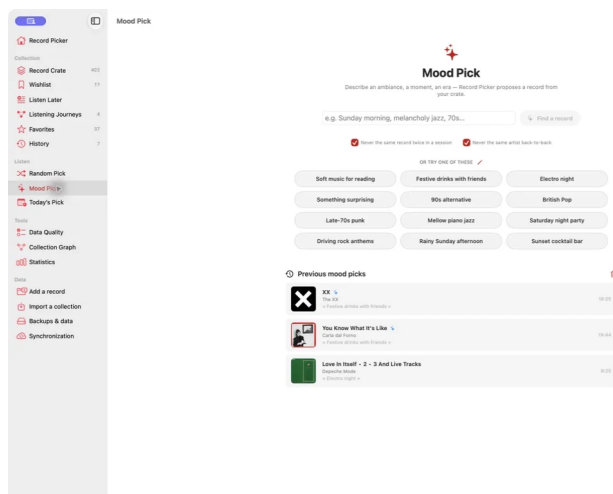

Three ways to choose

Record Picker 2.6 - Mac - EN

Random Pick

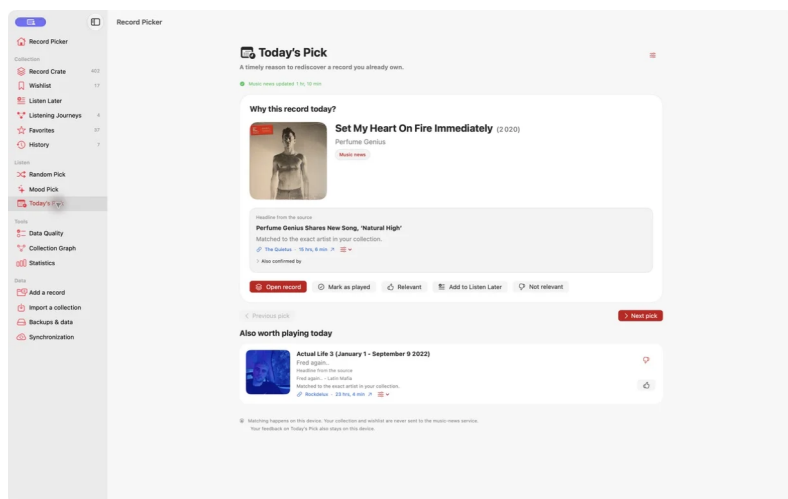

A standard or weighted draw, with filters, favorites and exclusions.

Record Picker 2.6 - Mac - EN

Mood Pick

Describe a mood. Record Picker finds a fitting record in your own collection.

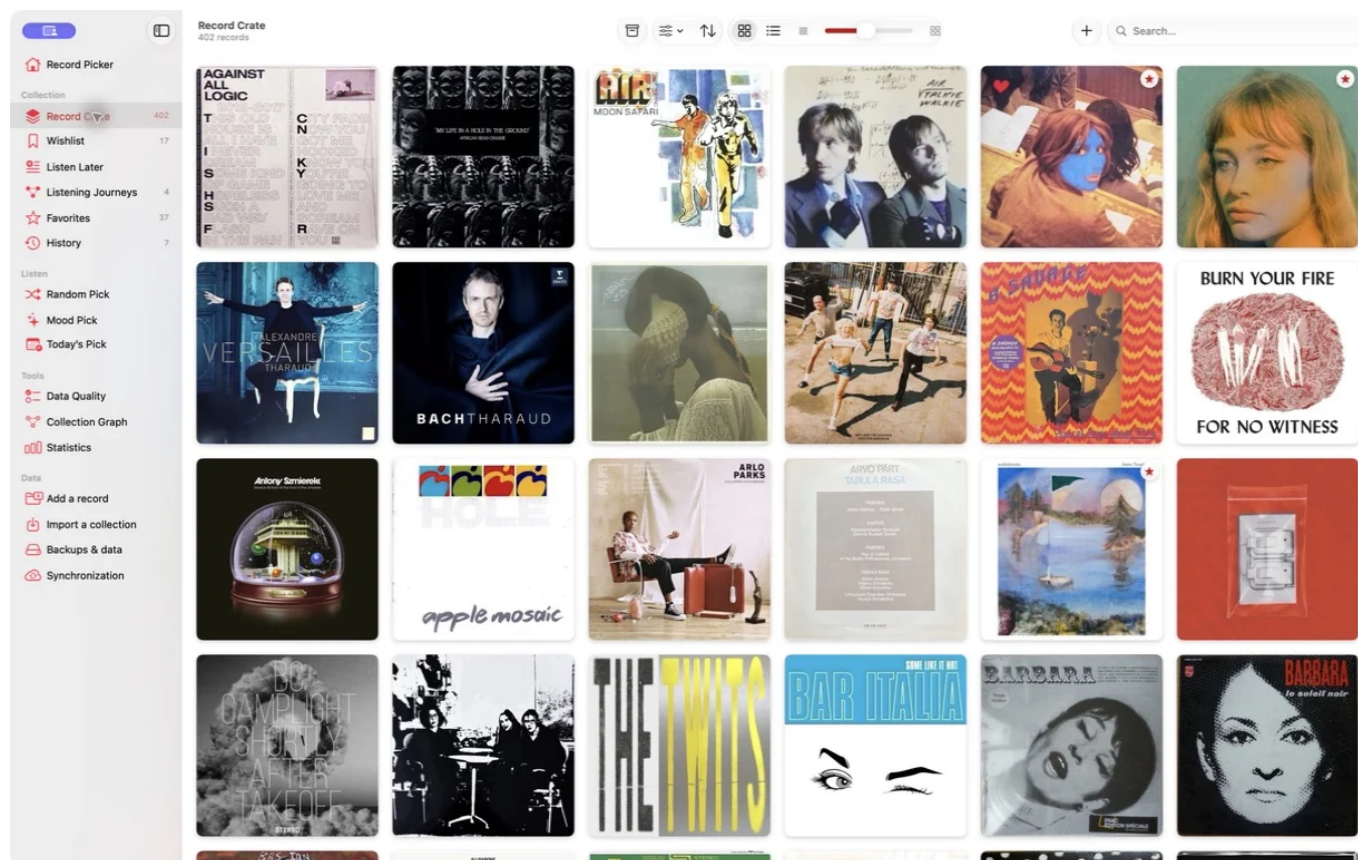

Record Picker 2.6 - Mac - EN

Today's Pick

Explained, sourced suggestions matched to your collection on your device.

A clearer view of your collection

Record Picker 2.6 - Mac - EN

Catalog, explore, rediscover

Browse covers, find a record through search, explore the Collection Graph and prepare a Listening Journey. Your data stays under your control.

Backups and reliability in 2.6

Version 2.6 improves collection backups and cover artwork restoration. iCloud synchronization is optional.

The Mac screenshots in this kit were captured from version 2.6 (41), in English.

Press demonstration collection

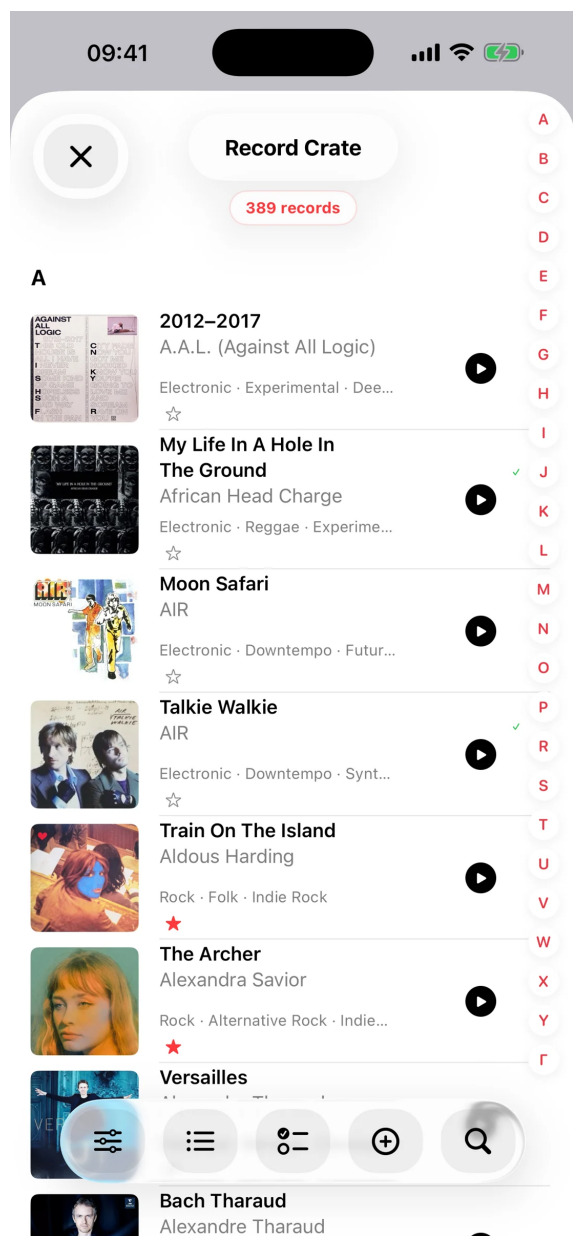

335 records for a complete review

The press file contains 266 albums and 69 classical interpretations connected through 15 works. It lets reviewers explore the app without using their personal music library.

Import: Settings > Data > Import collection CSV.

The iPhone 2.6 screenshot illustrates the interface. It shows a different collection and does not represent the contents of the press file.

The supplied visuals use authentic screenshots only. Older iPad and Apple Watch screenshots have been removed from this kit.
