A good reason to pull a record off the shelf.

A native app for cataloguing and rediscovering a vinyl and CD collection.

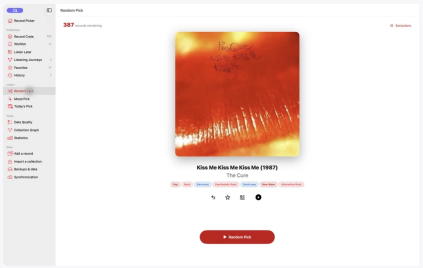

iPhone | iPad | Apple Watch | Mac | Windows

Record Picker 2.6 is available on iPhone, iPad, Apple Watch, Mac and Windows 11.

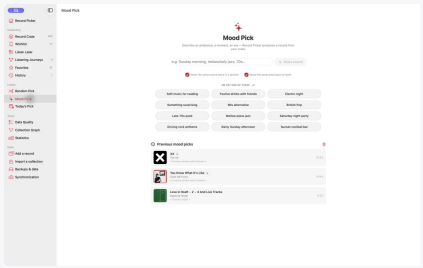

Version 2.6 improves backups, cover artwork restoration and reliability, while bringing the same essential picking and cataloguing tools to PC.

Three ways to choose

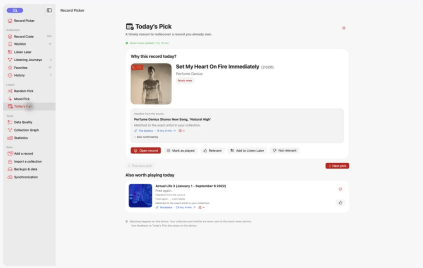

Random Pick

A standard or weighted draw, with filters, favourites and exclusions.

Mood Pick

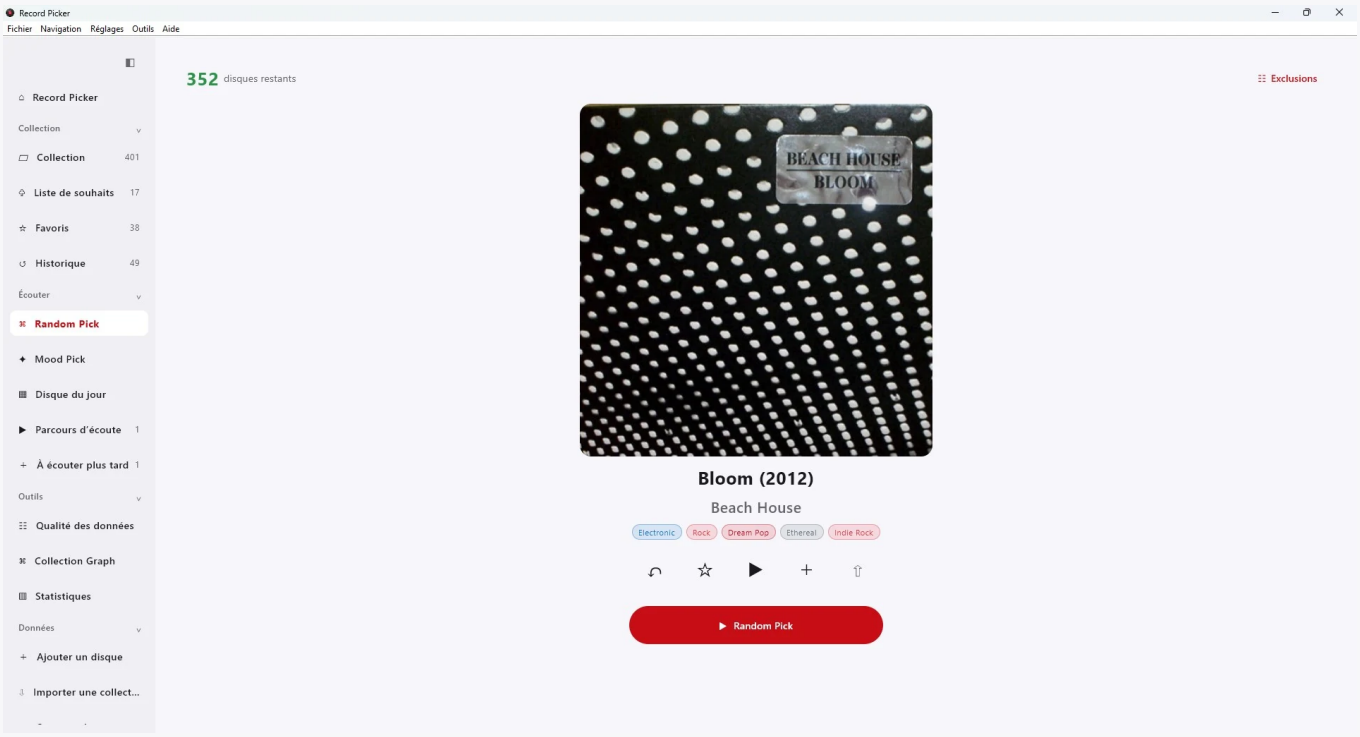

Describe a mood. Record Picker finds a fitting record in your own collection.

Today's Pick

Explained, sourced suggestions matched to your collection on your device.

Record Picker 2.6 on Windows

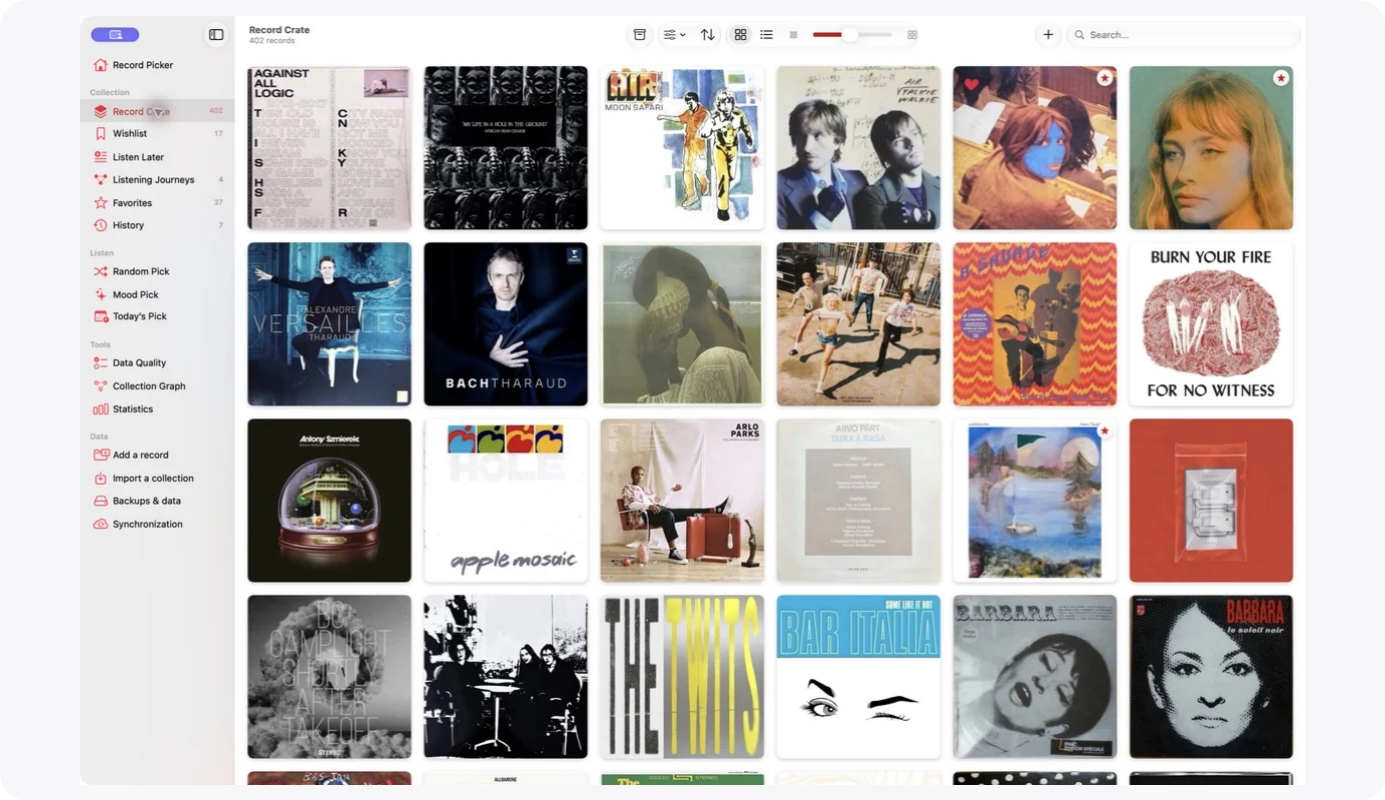

Available from the Microsoft Store for Windows 11 on x64 and ARM64 PCs. The public interface is available in English and French.

Authentic Record Picker 2.6 Windows capture, shown in French.

Microsoft Store

A clearer view of your collection

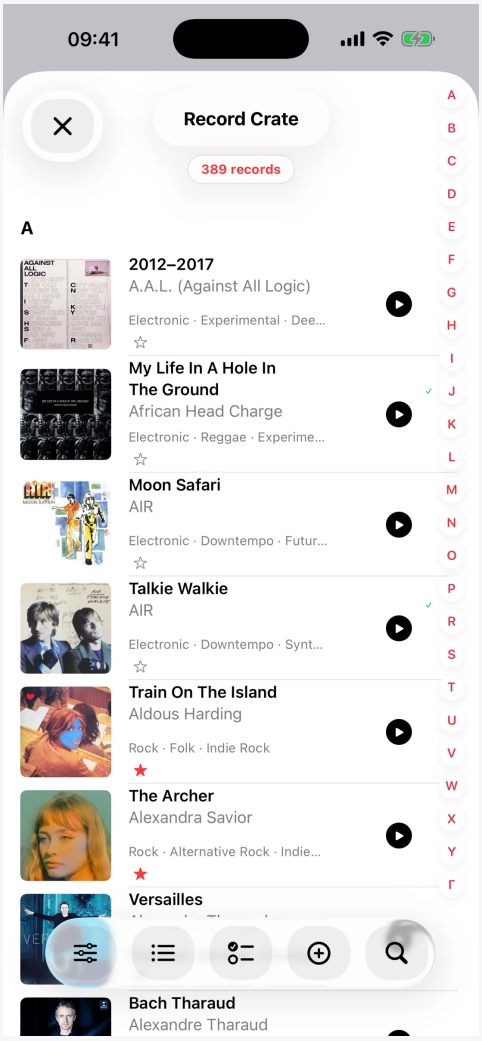

Catalogue, explore, rediscover

Browse covers, find a record, explore the Collection Graph and prepare a Listening Journey. Your data stays under your control.

Backups and reliability

Version 2.6 improves collection backups and cover artwork restoration. iCloud synchronisation remains optional on Apple devices.

Press demonstration collection

335 records for a complete review

The press file contains 266 albums and 69 classical interpretations connected through 15 works. It lets reviewers explore the app without using their personal music library.

Apple import: Settings > Data > Import collection CSV.

The iPhone 2.6 capture illustrates the interface and shows a different collection. Every supplied visual is an authentic app capture.
